

SSuite WordGraph Editor

A professional word processor for all systems...

Introduction...

SSuite WordGraph is a **full featured** word processor that creates rich text documents to make writing documents more convenient, efficient, and comfortable. SSuite WordGraph is an **original free software** application that is capable of running on any operating system.

You also don't have any unnecessary functions and features hogging all your precious computer resources or overwhelming the screen like other bloated word processors. It has **no need for Java or DotNet** as well to work successfully. This makes it run extremely fast, is soft and gentle on the eyes (pleasantly colourful interface), and very easy to use without slowing your computer down to a crawl.

SSuite WordGraph has also been designed to fit your screen more efficiently to create the correct proportions for your eyes. There is no more squinting or moving closer to the monitor to see what button or heading you are currently viewing on higher resolution monitors. {See below for more information}

Features Found in SSuite WordGraph:

SSuite Office
No Java - No DotNet

1. Insert tables, word art, expressions and equations.
2. Instantly collaborate with anyone on your network.
3. Insert images, objects, and photos from digital sources.
4. Instant online internet search with our new Groot engine.
5. Online dictionary to check the correct meaning of words.
6. A live word and character count displayed in the status bar.
7. Online language translations for international document distribution.
8. A live thumbnail preview panel for print, PDF, and image creation view.
9. Drag and drop content directly from other applications or even your web browser.
10. Access your documents directly from your online cloud storage account from WordGraph.

*This is version v14.18.17.17 with NetVine LAN Suite...
{ Install-Setup version 8.48.14 }*

SSuite WordGraph Document View

To set the correct focus or zoom factor on startup for WordGraph, just go to the main menu and select the following: **Tools >> WordGraph Options...**

Now simply select the focus or zoom factor you want for WordGraph to display your text in, when opening or starting a document.

Recommended Zoom Factors:

1024 x 768	>>	100%
1366 x 768	>>	130%
1600 x 900	>>	150%
1920 x 1080	>>	150%

Match SSuite WordGraph with your screen:

You are now able to upsize your existing installation of WordGraph to match your screen size for better viewing and user-interaction.

Just download the appropriate WordGraph zip file that will fit your screen the best:

WordGraph 1024 x 600

http://www.ssuitemsoft.com/downloads/custom/WordGraph_1024x600.zip

WordGraph 1368 x 768

http://www.ssuitesoft.com/downloads/custom/WordGraph_1368x768.zip

WordGraph 1600 x 900

http://www.ssuitesoft.com/downloads/custom/WordGraph_1600x900.zip

WordGraph 1920 x 1080 Full HD

http://www.ssuitesoft.com/downloads/custom/WordGraph_1920x1080HD.zip

Unzip, copy, and paste the new files over the existing ones in the installation folder of WordGraph:

C:\Program Files\SSuiteWordGraph or C:\Program Files (x86)\SSuiteWordGraph

SSuite WordGraph now runs with "Full Administrator" rights automatically for best user-experience and performance running on All Windows systems.

Does not have any impact on your system's security.

Windows Help Files

Please take note about the help files:

The help files will not open in Windows Vista or Windows 7 / 8 / 10. Windows itself displays a message that says it does not support "WinHlp32.exe" anymore.

The Windows Help program (WinHlp32.exe) is no longer included with Windows Vista or Windows 7 / 8 / 10. Users who want to view 32-bit .hlp files must download the program from the Microsoft Download Centre, and then install it on their computers. All 3rd party software developers are prohibited from distributing this file with their software installation(s).

Below are all the download links to the relevant Windows operating systems that needs the "WinHlp32.exe" executable to perform correctly.

Click below get the latest HelpFile for your Windows System:

<https://www.ssuiteoffice.com/resources/How-To-Run-Helpfiles-On-Windows.htm>

OR

<https://www.ssuiteoffice.com/software/mswindowshlp32pack.htm>

To install, just double-click on the downloaded file and Windows will do the rest. The help files will now run normally. There is no need for a restart.

{ WinHlp32.exe - 640 KB in download size }

The Windows 10 "WinHlp32.exe" will NOT be released...

Microsoft has announced that it will not implement the file for future use in Windows 10

Windows 10 - Quick Solution without the help of Microsoft or any installations:

For users who need "winhlp32.exe", just get a copy from a Windows XP system.

It is located in **c:\windows**. Then, on Windows 10, boot to the command prompt or login using the built-in "Administrator" account, go to the windows folder, and replace the stub with winhlp32.exe from the XP system.

Problem solved - until you run sfc /scannow. This is yet another annoyance caused by Microsoft not wanting us to have a functional HELP for older programs.

Download WinXP Helpfile here:

<https://www.ssuiteoffice.com/downloads/windows/WinXP-winhlp32.zip>

How to enable the hidden "Administrator" Account in all of the Windows systems:

Run the command prompt { Admin } and enter:

```
net user administrator /active:yes
```

This will then activate the account. Just log off and re-login with the Administrator account. No password is necessary, just press on the enter button to continue.

To disable the Admin account:

```
net user administrator /active:no
```

This will then activate the account. Just log off and re-login with the Administrator account. No password is necessary, just press on the enter button to continue.

Windows printer environment...

If you are installing this software on a stand-alone computer that does not have a printer connected or does not have a printer driver installed, please simply install or load a generic driver from Windows's list of drivers. You may install any ink jet printer driver from Canon or HP for best results. {e.g. Canon i250/i1500 or HP 690C/710}

If you have a printer, make sure it is connected and switched on, as you may get an error message saying the WordGraph application has stopped working { This is a Windows 10 Error, our application is NOT at fault }.

This only happens if you don't have a printer set as your default printer, the printer is not connected, or not communicating with your computer!

If you don't want to install a printer driver, simply go to the printer page on the control panel and select the Microsoft XPS Document Writer as the default Printer. As simple as that!

This is needed for creating the best enhanced working environment for our word processor's print preview features. Thank you.

How to use the new custom spell checker...

To use the custom spell checker successfully, just follow these easy steps...

1. To spell check a whole document, just click on the Custom Spell Checker button. 
2. To spell check a paragraph, just double-click / select the paragraph and click on  button.
3. To spell check a single word, just double-click / select the word or words and click on the  button.

That is it, the whole document, selected paragraph or word, will now appear in the Spell Checker automatically.

Just click on the "Start Checking" button and correct all your spelling mistakes fast... 

When you are finished spell checking, just click on the "Copy to clipboard" button and paste your corrected text back into your document... 

Document File Formats in SSuite WordGraph Editor:

Standard Open / Save Document Formats:

1. Plain Text -- Plain Text ANSI (*.txt)
2. XML File Format -- XML File (*.xml)
3. C++ File Format -- C++ File (*.cpp)
4. SQL File Format -- SQL File (*.sql)
5. Plain Text -- Plain Text Unicode (*.txt)
6. Pascal File Format -- Pascal File (*.pas)
7. C++ Header File Format -- Header File (*.h)
8. Rich Text Format -- Rich Text Format (*.rtf)
9. Web Page Source File -- Web Page (*.htm, *.html)
10. Rich Text Compressed Format {compresses up to 90%} -- Rich Text Compressed (*.rtc)
11. Microsoft Word Document Format -- **Word 97-2003 & 6.0/95 - RTF (*.doc) > MS Office 95 - 2007**

Please Take Note:

There are two different types of **doc** formats available. The first type is the official proprietary **MS Doc** format that is locked and requires a license from Microsoft. The second **doc** format is the one we use, which is an open generic **doc** format that does not require special software to open...

*hence the name - **Word 97-2003 & 6.0/95 - RTF (*.doc)***

Digital Document Formats in WordGraph Editor: { Keeping it Green - No More Paper }

1. Windows Bitmap File Format -- (*.bmp)
2. Tagged Information File Format -- (*.tiff)
3. Portable Document File Format -- (*.pdf)
4. SSuite Presentation File Format -- (*.ssp)
5. Graphics Interchange File Format -- (*.gif)
6. Windows Enhanced File Format -- (*.emf)
7. Joint Photographic Experts Group -- (*.jpg)
8. Portable Network Graphic File Format -- (*.png)
9. Portable Documents File Format -- Text Only (*.pdf)

Updates Made to the Graphical Software:

EZPhoto Editor - New interface cursors for better viewing and also enhanced importing and exporting of image formats. New Print Preview added. New toolbar, colour bar added.

Import / Open:
